REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art fails to show or fairly teach a cryogenic tank with a two-phase fluid which is converted to a one phase fluid with the heat leaking through the insulation. Raczkowski shows a fluid vessel which increases the liquid amount in the tank using heat, but the fluid is not cryogenic and a heater is used. These differences with the fact that the base references are not used to contain a fluid changing to one state are seen as sufficient to provide a lack of motivation to combine the references to obtain the claimed method and device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
